SUMMARY

Content Operations Specialist with 5 years of experience managing digital media workflows, technical partner onboarding, and content delivery pipelines. Skilled in leveraging AI, automation, and custom tooling to improve operational efficiency, resolve data discrepancies, and support scalable content launches

PROFESSIONAL EXPERIENCE

Roku, Inc.

Austin, TX

Content Operations Associate

February 2026 - Present

- Manage end to end technical onboarding for content partners on The Roku Channel, leveraging internal tooling to ingest, test, validate, and greenlight assets for production delivery
- Developed custom internal tools using APIs and AI-assisted workflows to triage content parity reports, automate data discrepancy identification, and accelerate validation processes
- Authored technical design documentation and operational process guides for internal software tools, standardizing workflows and streamlining daily cross-functional team operations

Def-Logix, Inc. - DoD Cybersecurity Contracting

San Antonio, TX

Media Coordinator II

January 2023 - October 2025

- Managed all in-house multimedia production, contributing to the successful fulfillment of a \$100M DoD contract
- Drove a 30% increase in organic impressions and site traffic by leveraging Google Search Console and Yoast SEO to optimize on-page content and UX
- Designed DoD compliant marketing collateral, including product/service data sheets, capability summaries, demonstration videos, and corporate logos/icons for commercial AI and federal programs, helping secure a 15% increase in awarded government contracts
- Standardized company wide marketing and technical documentation, collaborating with DevOps and R&D to author mission essential manuals and streamline training for new personnel
